AMOLED MODULE

Module (型号):	DXQ120MYB2416A
Customer (客户):	
Customer P/N (客户型号):	

If there is no special request from customer, dongxingqiang Electromics Shenzhen will not reserve the tooling of the product under the following conditions:
1. There is no response from customer in one years after dongxingqiang Electromics Shenzhen submit The samples;
2. There is no order in one years after the latest mass production. And correlated data (include quality record) will be reserved one year more after tooling was discarded.

WRITTEN BY	CHECKED BY	APPROVED BY

■ SCOPE

This AMOLED module Specification defines general provisions and inspection standard, AMOLED modules Involved are supplied by **dongxingqiang Electromics Shenzhen**. In the process of using, if unforeseen problem or unspecified items may occur, we have to negotiate to resolve the issue with the customer certainly.

■ FEATURES

- 1) Display color: 16.7M colors(24bits)
- 2) Display format: 1.19 Square 390*390 天马
- 3) Interface: QSPI
Driver IC: SH8601A-W14-T06 (晟合)

TOUCH IC: CHSC5816

- 4) Polarizer: Hard Coating Polarizer

■ APPLICATION

Smart Watch

■ GENERAL INFORMATION

Item	Contents	Unit
Display Mode	AMOLED	/
LTPS Glass Outline (W×H)	36.50*36.50*2.08	mm
Encapsulation Glass Outline (W×H)	33.82*33.22*0.55	mm
Active area	30.42*30.42	mm
Number of Dots	1.2	/
Diagonal Inch	2.04	inch
Pixel pitch (W×H)	78× 78	um
Glass Thickness	0.3(LTPS) 0.2 (Encap) 0.5(Total)	mm

■ ABSOLUTE MAXIMUM RATINGS

Parameter	Symbol	Min	Max	Unit
Supply voltage (Display)	VCC	2.7	3.6	V
	IOVCC	1.65	3.3	V
	ELVDD	3.25	3.35	V
	ELVSS	-3.35	-3.25	V
Operating temperature	T _{OP}	-20	70	°C
Storage temperature	T _{ST}	-30	80	°C
Humidity	RH	-	90	%RH

Note: Absolute maximum ratings means the product can withstand short-term, NOT more than 120 hours. If the product is a long time to withstand these conditions, the life time would be shorter.

■ ELECTRICAL CHARACTERISTICS

Parameter		Symbol	Condition	Min	Typ	Max	Unit
Supply voltage (Display)		VCC		2.7	3.3	3.6	V
		IOVCC		1.65	1.8	3.3	V
		ELVDD	-	3.25	3.3	3.35	V
		ELVSS	-	-3.35	-3.3	-3.25	V
Input voltage	'L' level	VIL	IOVCC=1.65V ~3.3V	GND	-	0.2*IOVCC	V
	'H' level	VIH		0.8*IOVCC	-	IOVCC	V
Output voltage	'L' level	VOL	I(OH)=-1mA	GND	-	0.2*IOVCC	V
	'H' level	VOH	I(OL)=+1mA	0.8*IOVCC	-	IOVCC	V
Current (Display)	Sleep out mode	Ivcc	Full white display	-	2	4	mA
		IioVCC		-	1.5	3	mA
		I _{ELVDD/ELVSS}		-	13	19.5	mA
	Sleep in mode	Ivcc		-	20	40	uA
		IioVCC		-	50	100	uA
	Deep Standby Mode	Ivcc		-	1	3	uA
		IioVCC		-	1	3	uA
Frame Frequency		f _{FRM}		-	45	-	Hz

■ OPTICAL CHARACTERISTICS

Item	Symbol	Condition	Min	Type	Max	Unit	Note

Lifetime	T95	25°C	240			h	

Note1. Surface Luminance

- Measurement equipment: CS2000 or similar equipment.
- Measuring surroundings: Dark room.
- Measuring temperature: $T_a=25^\circ\text{C}$.
- The data are measured after OLEDs are lighted on for more than 5 minutes and all pixels are fully white.
- The Surface Luminance is the average value of 5 measured spots (Fig-1):

L_v = Average Luminance with all white pixels (P₁, P₂, P₃, P₄, P₅)

Note2. Luminance Uniformity

- Measurement equipment: CS2000 or similar equipment.
- Measuring surroundings: Dark room.
- Measuring temperature: $T_a=25^\circ\text{C}$.
- The data are measured after OLEDs are lighted on for more than 5 minutes and all pixels are fully white.
- The Luminance Uniformity is calculated by using following formula:

$$\delta \text{ WHITE} = L_p (\text{Min.}) / L_p (\text{Max.}) \times 100 (\%)$$

$L_p (\text{Min.})$ = Minimum Luminance with all white pixels (P₁, P₂, P₃, P₄, P₅)

$L_p (\text{Max.})$ = Maximum Luminance with all white pixels (P₁, P₂, P₃, P₄, P₅)

Note3. Contrast Ratio

- Measurement equipment: CS2000 or similar equipment.
- Measuring surroundings: Dark room.
- Measuring temperature: $T_a=25^\circ\text{C}$.

- The data are measured after OLEDs are lighted on for more than 5 minutes.
- The Contrast Ratio is calculated by using following formula:

$$\text{Contrast Ratio(Cr)} = L_w / L_b$$

L_w = Average Luminance with all **white** pixels (P_1, P_2, P_3, P_4, P_5)

L_b = Average Luminance with all **black** pixels (P_1, P_2, P_3, P_4, P_5)

Fig-1

Note4. Viewing Angle

- Measurement equipment: DMS803 or similar equipment.
- Measuring surroundings: Dark room.
- Measuring temperature: $T_a=25^{\circ}\text{C}$.
- The Viewing Angle is the angle at which the contrast ratio is greater than 10. The angles are determined for the horizontal or x axis and the vertical or y axis with respect to the z axis which is normal to the display surface.

Fig-3

Note5. Color Coordinate of CIE1931

- Measurement equipment: CS2000 or similar equipment.
- Measuring surroundings: Dark room.
- Measuring temperature: $T_a=25^{\circ}\text{C}$.
- The x, y value of Color Coordinate is determined by measuring at center position of the display panel.

■ INTERFACE DESCRIPTION

Interface NO.	Symbol	Description
1	RESET	A reset pin.
2	MTP(NC)	NC
3	TE	Output a frame head pulse signal
4	CS	Chip select signal input
5	CLK	Usef to be serial interface clock
6	QSPI_SI00	Input data bus for QSPI.
7	QSPI_SI01	Input data bus for QSPI.
8	GND (DET)	Ground.
9	VCC 3.3V	Power Supply for Analog, Digital System and Booster Circuit.
10	GND	Ground.
11	VBAT	Power supply for pixel circuit.
12	VBAT	Power supply for pixel circuit.
13	GND	Ground.
14	GND	Ground.
15	VCC 3.3V	Power Supply for Analog, Digital System and Booster Circuit.
16	TP_VCC	TP Power Supply for Analog, Digital System and Booster Circuit.
17	TP_INT	TP interrupt signal
18	TP_RST	TP reset pin
19	TP_SCL	TP I2 clock signal
20	TP_SDA	TP I2 Input signal
21	GND	Ground.
22	QSPI_SI03	Input data bus for QSPI.
23	QSPI_SI02	Input data bus for QSPI.
24	VCI-EN	Swire protocol setting pin of Power IC.

■ RELIABILITY TEST CONDITIONS

No	Test Item	Test condition	Criterion
1	High Temperature Storage	80°C±2°C 336H Restore 2H at 25°C Power off	After testing, cosmetic and electrical defects should not happen.
2	Low Temperature Storage	-30°C±2°C 336H Restore 2H at 25°C Power off	
3	High Temperature Operation	70°C±2°C 336H Restore 2H at 25°C Power on	
4	Low Temperature Operation	-20°C±2°C 336H Restore 4H at 25°C Power on	
5	High Temperature & Humidity Operation	60°C±2°C 90%RH 336H Power on	
6	Temperature Cycle	--30°C ↔ 25°C ↔ 80°C 30min 5min 30min after 300cycle, Restore 2H at 25°C Power off	
7	Vibration Test	10Hz~150Hz, 100m/s ² , 120min	
8	Shock Test	Half-sinewave, 300m/s ² , 11ms	
9	Drop Test(package state)	The whole machine height 1 meter free fall, reinforced concrete floor	1. After testing, cosmetic and electrical defects should not happen. 2. The product should remain at initial place 3. Product uncovered or package broken is not permitted
10	MTBF	Bend test 100000hrs	After testing, cosmetic and electrical defects should not happen.
11	Ball impact	Ball weight: 110G, diameter: 32MM HEIGHT: 20CM this test is machine test, check whether the screen components meet the test requirements	No broken screens or After testing, cosmetic and electrical defects should not happen.
12	FPC tension	0.5 N, pull it out	No FPC breaks, and no lighting effects
13	Electro Static Discharge Test(non-operation)	150pF, 330Ω, Contact:±4KV, Air:±8KV Measure point :LCD glass and metal bezel	IEC61000-4-2:2001 GB/T17626.2-2006

OUTGOING QUALITY STANDARD	Edition: A
TITLE:FUNCTIONAL TEST & INSPECTION CRITERIA	AMOLED Product
This specification is made to be used as the standard acceptance/rejection criteria for AMOLED Product. 1.1 Sample plan Sampling plan according to GB/T2828.1-2003/ISO 2859-1: 1999 and ANSI/ASQC Z1.4-1993, normal level 2 and based on: Major defect: AQL 0.65 Minor defect: AQL 1.5 1.2 Inspection condition Visual: Viewing distance for cosmetic inspection is about 30cm with bare eyes, and under an environment of 30~40W light intensity(1000±200LUX) or function inspection (illumination intensity≤50LUX) , all directions for inspecting the sample should be within 45°against perpendicular line. Cosmetic inspection time is 10s, judged pass if the defect cannot be seen in 15s. Inspection pattern: Red/Green/Blue/White/Black/128 gray scale 1.3 Definition of AMOLED inspection zone Zone A: Character/Digit area Zone B: Viewing area except Zone A (Zone A + Zone B=minimum Viewing area) Zone C: Outside viewing area (invisible area after assembly in customer's product)	

1.4 Inspection standards

1.4.1 Definition of the defect size:

Spot shape:

$$D = (L + W) / 2$$

D: Diameter L: Length W: Width N: Number DS: Distance

Line shape:

1.4.2 Major defect

Item No.	Inspection Item	Inspection standards
(1)	Function defects	1) No display not allowed 2) Display abnormally not allowed 3) Bright/Dark line and other line-shape function defect not allowed
(2)	Component	Missing/breakage component not allowed
(3)	Outline dimension	Overall outline dimension beyond the drawing is not allowed
(4)	Sharp edge	Not allowed
(5)	FPC	Split/Breakage FPC not allowed

1.4.3 Minor defect

Item No.	Inspection Item	Inspection standards			
(1)	Spot defect: Black and white Spot, Foreign Particle, Dirt under polarizer (Except dark pixel)	Grade A		Grade B	
		Size (mm)	Acceptable Qty.	Size (mm)	Acceptable Qty.
		$D \leq 0.10$, $DS \geq 10$	Disregard	$D \leq 0.10$, $DS \geq 10$	Disregard
		$0.10 < D \leq 0.2$, $DS \geq 10$	$N \leq 2$	$0.10 < D \leq 0.25$, $DS \geq 10$	$N \leq 3$
		$D > 0.2$	$N = 0$	$D > 0.25$	$N = 0$
(2)	Bright spot (pixel)	$N \leq 0$		$N \leq 0$	
(3)	Dark spot (pixel)	$N \leq 4$, $DS \geq 10$		$N \leq 8$, $DS \geq 10$	

(4)	Line defect Black line, White line, Foreign material under polarizer	Grade A			Grade B		
		L (Length)	W (Width)	Acceptable Qty.	L (Length)	W (Width)	Acceptable Qty.
			$W \leq 0.02$	Disregard		$W \leq 0.02$	Disregard
		$L \leq 2.0$	$0.02 < W \leq 0.03$	$N \leq 2$	$L \leq 2.0$	$0.02 < W \leq 0.03$	$N \leq 3$
		$L \leq 1.0$	$0.03 < W \leq 0.05$	$N \leq 2$	$L \leq 1.0$	$0.03 < W \leq 0.05$	$N \leq 3$
			$W > 0.05$	$N = 0$		$W > 0.05$	$N = 0$
(5)	Mura	Judged OK if unviewable by using 3% ND Filter on 128 gray scale pattern. Special requirement refer to the limit sample signed by customer			Not affect assembly use. Special requirement refer to the limit sample signed by customer		
(6)	Color mixing	Judged OK if unviewable by using 2% ND Filter on White (255 gray scale) pattern. Special requirement refer to the limit sample signed by customer			Not affect assembly use. Special requirement refer to the limit sample signed by customer		
(7)	Bubble	Size (mm)		Acceptable Qty.	Size (mm)		Acceptable Qty.
		$D \leq 0.2$		Disregard	$D \leq 0.2$		Disregard
		$0.2 < D \leq 0.5$		$N \leq 2$	$0.2 < D \leq 0.5$		$N \leq 3$
		$D > 0.5$		$N = 0$	$D > 0.5$		$N = 0$
(8)	Fingerprint	Not allowed					
(9)	 Usual surface cracks	$z \leq t$: $Y \leq 0.5\text{mm}$, $X \leq 2\text{mm}$ z : Crack thickness; t : Glass thickness			$z \leq t$: $Y \leq 1\text{mm}$, $X \leq 3\text{mm}$ z : Crack thickness; t : Glass thickness		
(10)	 Chips on corner	$z \leq t$: $Y \leq 2\text{mm}$, $X \leq 2\text{mm}$ z : Chips thickness; t : Glass thickness			$z \leq t$: $Y \leq 3\text{mm}$, $X \leq 3\text{mm}$ z : Chips thickness; t : Glass thickness		
(11)	 Cracks tend to break	Cracks tend to break are not allowed. Edge burrs disregard.					

Notes: Base on Truly (Huizhou) Smart Display Ltd standard if the defects not be mentioned above, all the standards ultimately oriented to the terminal customer and satisfy customer's request.

■PRECAUTIONS FOR USING AMOLED MODULES

Handing Precautions

- 1 The display panel is made of glass and polarizer. As glass is fragile. It tends to become or chipped during handling especially on the edges. Please avoid dropping or jarring. Do not subject it to a mechanical shock by dropping it or impact.
- 2 Do not apply excessive force to the display surface or the adjoining areas since this may cause the color tone to vary. Do not touch the display with bare hands. This will stain the display area and degraded insulation between terminals (some cosmetics are determined to the polarizer).
- 3 The polarizer covering the display surface is soft and easily scratched. Handle this polarizer carefully. Do not touch, push or rub the exposed polarizers with anything harder than an HB pencil lead (glass, tweezers, etc.). Do not put or attach anything on the display area to avoid leaving marks on it. Condensation on the surface and contact with terminals due to cold will damage, stain or dirty the polarizer. After products are tested at low temperature they must be warmed up in a container before coming in to contact with room temperature air.
- 4 If the display surface becomes contaminated, breathe on the surface and gently wipe it with a soft dry cloth. If it is heavily contaminated, moisten cloth with one of the following solvents
 - Isopropyl alcohol
 - Ethyl alcohol

Do not scrub hard to avoid damaging the display surface.

- 5 Solvents other than those above-mentioned may damage the polarizer. Especially, do not use the following.
 - Water
 - Ketone
 - Aromatic solvents

Wipe off saliva or water drops immediately, contact with water over a long period of time may cause deformation or color fading. Avoid contact with oil and fats.

- 6 Exercise care to minimize corrosion of the electrode. Corrosion of the electrodes is accelerated by water droplets, moisture condensation or a current flow in a high-humidity environment.
- 7 Do not attempt to disassemble or process the AMOLED module.
- 8 NC terminal should be open. Do not connect anything.
- 9 If the logic circuit power is off, do not apply the input signals.
- 10 Electro-Static Discharge Control, Since this module uses a CMOS LSI, the same careful attention should be paid to electrostatic discharge as for an ordinary CMOS IC. To prevent destruction of the elements by static electricity, be careful to maintain an optimum work environment.

- Before removing AMOLED from its packing case or incorporating it into a set, be sure the module and your body have the same electric potential. Be sure to ground the body when handling the AMOLED modules.

- Tools required for assembling, such as soldering irons, must be properly grounded. Make certain the AC power source for the soldering iron does not leak. When using an electric screwdriver to attach AMOLED modules, the screwdriver should be of ground potentiality to minimize as much as possible any transmission of electromagnetic waves produced sparks coming from the commutator of the motor.

- To reduce the amount of static electricity generated, do not conduct assembling and other work under dry conditions. To reduce the generation of static electricity be careful that the air in the work is not too dry. A relative humidity of 50%-60% is recommended. As far as possible make the electric potential of your work clothes and that of the work bench the ground potential.

- The AMOLED module is coated with a film to protect the display surface. Exercise care when peeling off this

protective film since static electricity may be generated.

- 11 Since AMOLED has been assembled and adjusted with a high degree of precision, avoid applying excessive shocks to the module or making any alterations or modifications to it.

-
- Do not alter, modify or change the shape of the tab on the metal frame.
 - Do not make extra holes on the printed circuit board, modify its shape or change the positions of components to be attached.
 - Do not damage or modify the pattern writing on the printed circuit board.
 - Absolutely do not modify the zebra rubber strip (conductive rubber) or heat seal connector.
 - Except for soldering the interface, do not make any alterations or modifications with a soldering iron.
 - Do not drop, bend or twist the AMOLED.

Handling precaution for AMOLED

- 1 AMOLED is easy to be damaged. Please note below and be careful for handling.
- 2 Correct handling:
- 3 Incorrect handling:

Storage Precautions

- 1 When storing the AMOLED modules, the following precaution are necessary.
 - 1) Store them in a sealed polyethylene bag. If properly sealed, there is no need for the desiccant.
 - 2) Store them in a dark place. Do not expose to sunlight or fluorescent light, keep the temperature between 0°C and 35°C, and keep the relative humidity between 40%RH and 60%RH.
 - 3) The polarizer surface should not come in contact with any other objects (We advise you to store them in the anti-static electricity container in which they were shipped).
- 2 Transportation Precautions
 - 1) During shipment, please handle with care. The packaging bag can not be broken, step on trap. Packaging Carton layer height cannot be over two meters.
 - 2) The transportation process should pay attention to the waterproof and moisture-proof measures. Product cannot be watering. Ethylene sealed bags cannot be unsealed.
- 3 Others
 - 1) To minimize the performance degradation of the AMOLED modules resulting from destruction caused by static electricity etc., exercise care to avoid holding the following sections when handling the modules.
 - a) - Exposed area of the printed circuit board.
 - b) - Terminal electrode sections.

USING AMOLED MODULES

1 Installing AMOLED Modules

The hole in the printed circuit board is used to fix AMOLED as shown in the picture below. Attend to the following items when installing the AMOLED.

- 1) Cover the surface with a transparent protective plate to protect the polarizer.
 - 2) When assembling the AMOLED into other equipment, the spacer to the bit between the AMOLED and the fitting plate should have enough height to avoid causing stress to the module surface, refer to the individual specifications for measurements. The measurement tolerance should be $\pm 0.1\text{mm}$.
- 2 Precaution for assemble the module with BTB connector:

Please note the position of the male and female connector position, don't assemble or assemble like the method which the following picture shows

3 Precaution for soldering the AMOLED

	Manual soldering	Machine drag soldering	Machine press soldering
No RoHS Product	290°C ~350°C. Time : 3-5S.	330°C ~350°C. Speed : 4-8 mm/s.	300°C ~330°C. Time : 3-6S. Press: 0.8~1.2Mpa
RoHS Product	340°C ~370°C. Time : 3-5S.	350°C ~370°C. Time : 4-8 mm/s.	330°C ~360°C. Time : 3-6S. Press: 0.8~1.2Mpa

- 1) If soldering flux is used, be sure to remove any remaining flux after finishing to soldering operation (This does not apply in the case of a non-halogen type of flux). It is recommended that you protect the AMOLED surface with a cover during soldering to prevent any damage due to flux spatters.
- 2) When soldering the PC board, the board should not be detached more than three times. This maximum number is determined by the temperature and time conditions mentioned above, though there may be some variance depending on the temperature of the soldering iron.

4 Precautions for Operation

- 1) If the display area is pushed hard during operation, the display will become abnormal. However, it will return to normal if it is turned off and then back on.
- 2) A slight dew depositing on terminals is a cause for electro-chemical reaction resulting in terminal open circuit. Usage under the maximum operating temperature, 50%RH or less is required.
- 3) Input logic voltage before apply analog high voltage such as AMOLED driving voltage when power on. Remove analog high voltage before logic voltage when power off the module. Input each signal after the positive/negative voltage becomes stable.
- 4) Please keep the temperature within the specified range for use and storage. Polarization degradation, bubble generation or polarizer peel-off may occur with high temperature and high humidity.

5 Safety

- 1) It is recommended to crush damaged or unnecessary AMOLEDs into pieces and wash them off with solvents such as acetone and ethanol, which should later be burned.

6 Limited Warranty

Unless agreed between TRULY and the customer, TRULY will replace or repair any of its AMOLED modules
